Eisinger Techno-Line with Radia – design in perfect harmony

Eisinger Swiss, the exclusive brand by Franke Kitchen Systems, presents the new Radia tap with matching dispenser and pop-up knob for the Techno-Line designer bowl range. The Techno-Line harmonises beautifully with the elegant Radia design thanks to virtually square corner radii of just 5 mm. It is a fine example of design and functionality in perfection.

Eisinger Radia harmonises perfectly with the bowls of the Eisinger Techno-Line. Fine radii lend a distinguished finishing touch to the edges of the basic square shape. The formal features of Eisinger Radia blend seamlessly with the tap ranges of the other six model lines and the matching dispensers of the design brand. The tap line is available in chrome in the elegant designs of Standard and Slanted.

Franke Kitchen Systems will present the Techno-Line with Radia at the Swissbau trade show from 12 – 16 January 2010 in Basel You can find us in Hall 2.1, Booth A32.
